

PRESS RELEASE

# MUGATO NOW AVAILABLE IN THE MICROSOFT AZURE MARKETPLACE

Copenhagen, Denmark — Mar 1, 2021

Microsoft Azure customers worldwide now gain access to Mugato to take advantage of the scalability, reliability and agility of Azure to drive application development and shape business strategies.

Mugato today announced the availability of Mugato in the Microsoft Azure Marketplace, an online store providing applications and services for use on Azure. Mugato customers can now take advantage of the productive and trusted Azure cloud platform, with streamlined deployment and management.

Mugato presents an intelligent, data-driven approach to successful cloud transformation. Transformation with Mugato starts with a detailed inventory of the existing digital estate, which provides the foundation for intelligent algorithmic advice with precise recommendations for planning the cloud adoption journey. The solution further serves algorithmic processing of the digital estate so that the transformation includes continuous optimization of the current spending to improve future IT.

The efficiency of data processing is enhanced by the technological benefits of incorporating Microsoft Azure into the Mugato service. All data collected by Mugato is stored and optimized in a local SQL Server database. From there, data is transferred to Microsoft Azure, where Mugato then processes data using advanced algorithms and machine learning.

The Mugato solution enables customers to discover, plan, improve and monitor their IT throughout the cloud transition and beyond, including classification of business applications and interdependencies, resource utilization models and many other features. Mugato thus provides a solution supporting Microsoft's commitment to drive digital transformation for people, organizations, and industries around the world.

Behind Mugato is an experienced team with 10+ years working in and collaborating with Microsoft. Mugato's CTO Michael Frandsen is Microsoft MVP, one of the few in Scandinavia,

and thus has extensive knowledge of how to utilize Microsoft products and services, enabling the team to provide a stable and effective solution for cloud transformation and continuous monitoring of the entire IT platform, whether customers intend for an entirely cloud-based environment or a hybrid environment.

Torben Andersen, CEO of Mugato, emphasizes the mutual benefits of Mugato as a Microsoft partner.

“Most customers are already taking advantage of Microsoft cloud offerings; however, they are eager to move more workloads into the cloud,” says Torben. “With the Mugato solution, customers get exactly the information needed to accelerate their cloud journey and take full advantage of Microsoft Azure.”

The Azure Marketplace is an online market for buying and selling cloud solutions certified to run on Azure. The Azure Marketplace helps connect companies seeking innovative, cloud-based solutions with partners who have developed solutions that are ready to use.

“We’re pleased to welcome Mugato to the Microsoft Azure Marketplace, which gives our partners great exposure to cloud customers around the globe,” says Jake Zborowski, General Manager, Microsoft Azure Platform at Microsoft Corp. “Azure Marketplace offers world-class quality experiences from global trusted partners with solutions tested to work seamlessly with Azure.”

## About Mugato

Mugato is a SaaS company founded in 2019, based in Copenhagen, Denmark. Our mission is to change the way cloud transformations are done today. With Mugato, your cloud transformation process is based on exceptional insights into your existing digital estate and intelligent algorithmic advice for your future IT. This is the intelligent, data-driven approach to successful cloud transformation.
